SUBJECT INDEX, VOLUME 19

A

PAGE

a-Amylase, herbicidal inhibition of GA-induced synthesis of 595
Abscisic acid and phenolics, role in nutsedge tuber dormancy ... 17
Absorption and penetration, of picloram and 2,4,5-T into detached live oak leaves 138
Absorption and translocation of 2,4,5-T in winged elm, environmental effects on 431
Absorption, ^{14}C-diuron by cotton 355
Absorption of ^{14}C-trifluralin, microradioautographic study of .. 363
Absorption, root, and translocation of picloram, by oats and soybeans 727
Absorption, translocation, and toxicity, of 2,4,5-T 510
Accumulation and uptake of naptalam by bean plants, influence of GA on 135
Activated carbon—vermiculite mixture, for increasing herbicide selectivity 79
Activity of chloramben, influence of incorporation depth on ... 394
Activity of diphenamid, effect of environment on 332
Activity, uptake, and movement of DCPA, site of 152
Adsorption and deactivation of atrazine and diuron, by charcoals 541
Adsorption, desorption, and leaching of diphenamid, in soils .. 67
Adsorption, picloram, by soil colloids and other adsorbents 417
Adsorption, volatilization, and leaching of prometryne, in relation to selectivity in cotton 6
Agricultural chemicals, benefits of 631
Alachlor, loss from soil 652
Alfalfa, dinoseb, and D(–) (3-chlorophenylcarbamoyloxy)-2*N*-isopropylpropionamide for dodder control in 551
Alfalfa, establishment on dodder-infested soil 222
Algae bioassay detection of pesticide mobility, in soils 685
Algae, marine, carbohydrate depression, by urea herbicides 568
Algae, soil, response to picloram-2,4-D mixtures 276
Amino acids of corn, incorporation of atrazine side chain into 133
Anatomy, growth, and nodulation of soybeans, effects of trifluralin on 147
Anatomy, of johnsongrass 385
Applications of atrazine, annual, soil persistence of 290
Applications, repeated, foliar, of MSMA on purple nutsedge ... 675
Aquatic plants, response to combinations of endothall and copper 643
Aquatic vascular plants, ecology in southern Ontario impoundments 225
Arsenical herbicide residues, determination in plant tissues 412
Arsenical herbicides, comparative phytotoxicity among four ... 558
Arsenicals, organic, and temperature, response of cotton to 294
ATP levels in *Chlorella*, comparative effects of diuron and chlorpropham on 274
ATP levels in excised soybean hypocotyls, herbicides effects on 319
ATPase and mitochondrial swelling, effects of picloram on 54
Atrazine and diuron, adsorption and deactivation by charcoals 541
Atrazine and simazine, increase yield and quality of range forage 370
Atrazine metabolism, by fall panicum and large crabgrass 409
Atrazine, soil persistence of repeated annual applications of 290
Atrazine-soil organic matter, interactions 279
Atrazine side chain, incorporation into amino acids of corn 133
Atrazine toxicity to tomatoes, effect of magnesium and photoperiod on 524
Atrazine translocation and metabolism, in sudangrass, sorghum, and corn 98
Atrazine uptake, by sudangrass, sorghum, and corn 98

B

Barnyardgrass control in rice, phenoxy acid herbicides for 203
Bermudagrass, effects of picloram on 521
Bioassay, rapid, for photosynthetic and respiratory inhibitors 658
Blue mustard, competition with winter wheat 340
Bovine serum albumin, sorption of substituted phenylamides onto 269

PAGE

Bracken, herbicidal suppression and effects on forage production 538
Brush, herbicides on, spray date effects on behavior of 200

C

Cabbage, mechanism of intraspecific selectivity to nitrofen 647
Cabbage, tomato, and lettuce seedlings, influence of four weeds on enzyme components of 735
Calcium chloride, effect on prometryne and fluometuron adsorption in soil 517
Canada thistle, penetration and translocation of picloram in 349
Carbohydrate depression in marine algae, by urea herbicides ... 568
Carrier, for some water-soluble herbicides 102
Charcoals, adsorption and deactivation of atrazine and diuron 541
Chemicals, agricultural, benefits of 631
Chloramben activity, influence of incorporation depth on 394
Chloramben, response of cucurbits to certain analogs of 491
Chlorella, comparative effects of diuron and chlorpropham on ATP levels in 274
2-Chloroethylphosphonic acid, effect on dicamba translocation in wild garlic 73
Chloroxuron postemergence treatments, on soybeans 219
Chlorpropham and diuron, comparative effects on ATP levels in *Chlorella* 274
Chromatography, electron capture gas, terbacil analysis by 307
Cocklebur competition, with redroot pigweed and cotton 580
Cocklebur, selective chemical control in cottonseed 346
Combinations, herbicide, effect on weeds and soybeans 695
Combinations, herbicide, in irrigated cotton 178
Combinations, herbicides and disulfoton, cotton response to 338
Combinations, herbicides with other pesticides, response of peanuts to 24
Combinations, endothall and copper, response of aquatic plants to 643
Common milkweed, growth characteristics of 193
Common purslane competition, in table beets and snap beans 4
Common ragweed, ecotypes of 64
Competition, between sugarbeets and kochia 125
Competition, blue mustard with winter wheat 340
Competition, common purslane in table beets and snap beans 4
Competition, cotton with cocklebur and redroot pigweed 580
Competition, cotton with sicklepod and tall morningglory 576
Competition, weed, effect on sunflowers 378
Control of johnsongrass selections, under different temperatures and dark periods 419
Control, selective chemical, cocklebur in cottonseed 346
Copper and endothall, response of aquatic plants to combinations of 643
Copper uptake, by parrotfeather 282
Corn, effect of seedbed preparation on distribution of weed seed in 666
Corn, incorporation of atrazine side chain into amino acids of 133
Corn, protection from herbicide injury by seed treatment 565
Corn, sudangrass, and sorghum, atrazine uptake by 93
Corn, sudangrass, and sorghum, translocation and metabolism of atrazine in 98
Cotton, absorption of ^{14}C-diuron 355
Cotton and weeds, phytotoxicity of fluometuron and its derivatives to 592
Cotton, competition with cocklebur and redroot pigweed 580
Cotton, competition with sicklepod and tall morningglory 576
Cotton, irrigated, herbicide combinations in 178
Cotton, irrigated, topical applications of DSMA and MSMA in 545
Cotton, response to combinations of herbicides and disulfoton 338
Cotton, response to temperature and organic arsenicals 294
Cotton seedlings, effects of IAA, kinetin, and trifluralin on 265
Cotton seedlings, effects of trifluralin and organophosphorus compounds on 166
Cotton, volatilization, leaching, and adsorption of prometryne in relation to selectivity in 6

PAGE

Cottonseed, selective chemical control of cocklebur in 346
Crops, several, reactions to dichlobenil 655
Cucurbits, response to certain analogs of chloramben 491
Cycloate, effect of soil type and irrigation method on lateral movement of 709
Cycloate, propachlor, and pyrazon, response of sugarbeets and weeds to 162

D

D(–) (3-chlorophenylcarbamoyloxy)-2*N*-isopropylpropionamide and dinoseb, for dodder control in alfalfa 551
2,4-D and dicamba, control of field bindweed, and crop response to chemical residues 717
2,4-D, detoxification by several plant species 721
2,4-D, effects on metabolism of ^{14}C-glucose in plant tissue 248
2,4-D, hydroxylation in several weed species 507
2,4-D on mixed-grass prairie, species susceptibilities to 526
2,4-D, root disfunction in honeyvine milkweed caused by 1
2,4-D-picloram mixtures, response of soil algae to 276
Dark periods and temperature, different, control of johnsongrass selections under 419
DCPA, site of uptake, movement, and activity of 152
DCPA, stem abnormality induced by 343
Deactivation and adsorption of atrazine and diuron, by charcoals 541
Degradation, fluometuron in sandy loam soil 691
Degradation, uptake, and translocation, diphenamid in plants 639
Depth of planting and soil type, influence on downy brome seed 82
Desorption, leaching, and adsorption, of diphenamid in soils 67
Detoxification, 2,4-D by several plant species 721
Development and growth, of johnsongrass ecotypes 141
Dicamba and 2,4-D, control of field bindweed, and crop response to chemical residues 717
Dicamba, effect on RNA and protein 301
Dicamba, picloram, and 2,3,6-TBA, and dissipation of 323
Dicamba, selectivity in wheat and wild buckwheat 598
Dicamba, translocation and metabolism in tartary buckwheat .. 107
Dicamba translocation, 2-chloroethylphosphonic acid effect in wild garlic 73
Dicamba, uptake, translocation, metabolism, and selectivity 113
Dichlobenil, for control of waterlilies 402
Dichlobenil, reactions of several crops to 655
Dichlobenil, volatility of 28
Dimethylpropynyl benzamide, effects on quackgrass rhizomes .. 174
Dinoseb and D(–) (3-chlorophenylcarbamoyloxy)-2*N*-isopropylpropionamide, for dodder control in alfalfa 551
Dinoseb, relative sensitivity of several plants to 671
Dinoseb, selectivity in an isoparaffinic oil carrier 706
Dipeptidase activity in squash cotyledons, effect of several herbicides on 682
Diphenamid and soil, effects of gamma radiation on 294
Diphenamid, effect of environment on activity of 332
Diphenamid in plants, uptake, translocation, and degradation of 639
Diphenamid, leaching, adsorption, and desorption, in soils 67
Diphenamid, relative sensitivity of several plants to 70
Dissipation, biological and non-biological, trifluralin from soil 285
Dissipation, of dicamba, picloram, and 2,3,6-TBA 323
Dissipation, picloram from vegetation of semi-arid rangelands 329
Disulfoton combinations with herbicides, cotton response to 338
Diuron, absorption by cotton 355
Diuron and atrazine, adsorption and deactivation by charcoals 541
Diuron and chlorpropham, comparative effects on ATP levels in *Chlorella* 274
Dodder, control in alfalfa with dinoseb and D(–) (3-chlorophenylcarbamoyloxy)-2*N*-isopropylpropionamide 551
Dodder-infested soil, establishing alfalfa on 222
Dormancy of nutsedge tubers, role of phenolics and abscisic acid in 17
Downy brome seed, influence of soil type and depth of planting on 82
DSMA and MSMA, topical applications in irrigated cotton 545
Dyers woad, germination of 76

E

Ecology, insect, of silverleaf nightshade 45
Ecology, aquatic vascular plants in southern Ontario impoundments 225
Ecotypes, johnsongrass, control of 229
Ecotypes, johnsongrass, growth and development of 141
Ecotypes, common ragweed 64
Endothall and copper, response of aquatic plants to combinations of 643
Environment, effect on activity of diphenamid 332
Environment, influence on metabolism of propanil in rice 501
Environmental effects, on absorption and translocation of 2,4,5-T in winged elm 431
Environmental factors, effect on pyrazon action in sugar beets 587
Enzyme components of cabbage, tomato, and lettuce seedlings, influence of four weeds on 735

F

Fall panicum and large crabgrass, metabolism of atrazine by ... 409
Fate, fluorodifen in resistant peanut seedlings 261
Fate, nitrogen in rape, redroot pigweed, and green foxtail 555
Field bindweed, control with dicamba and 2,4-D and crop response to chemical residues 717
Fluometuron and its derivatives, phytotoxicity to cotton and weeds 592
Fluometuron and prometryne adsorption in soil, effect of calcium chloride on 517
Fluometuron, degradation in sandy loam soil 691
Fluorodifen, fate in resistant peanut seedlings 261
Foliar, repeated applications, MSMA on purple nutsedge 675
Forage production, herbicidal suppression of bracken and effects on 538
Forage, range, atrazine and simazine increase yield and quality of 370

G

GA, influence on uptake and accumulation of naptalam by bean plants 135
GA-induced synthesis of *a*-amylase, herbicidal inhibition of 595
Gamma radiation, effects on soil and diphenamid 294
Germination and herbicide susceptibility, of six pigweed species 51
Germination and seedling development, effect of picloram on 58
Germination, of dyers woad 76
Germination, witchweed, stimulation by run-off water and plant tissues 678
Grass retardant, MH as a roadside 86
Green foxtail, rape, and redroot pigweed, fate of nitrofen in ... 555
Green foxtail, rape, and redroot pigweed, selectivity of nitrofen among 42
Growth and development, johnsongrass ecotypes 141
Growth characteristics, common milkweed 193
Growth, nodulation, and anatomy of soybeans, effects of trifluralin on 147

H

Herbicidal effects, picloram on bermudagrass 521
Herbicidal inhibition, GA-induced synthesis of *a*-amylase 595
Herbicidal suppression of bracken, effects on forage production 538
Herbicide activity, enhancement with an isoparaffinic oil carrier 701
Herbicide application, control of kudzu as influenced by time of 669
Herbicide combinations, effect on weeds and soybeans 740
Herbicide combinations, in irrigated cotton 178
Herbicide combinations with disulfoton, cotton response to 338
Herbicide effectiveness, soil residues, and phytotoxicity to peach trees 257
Herbicide injury, corn seed treatment for protection from 565
Herbicide residues, arsenical, determination in plant tissues 412
Herbicide residues, auger soil sampler for 583
Herbicide selectivity, activated carbon-vermiculite mixture for increasing 79
Herbicide susceptibility and germination, six pigweed species .. 51
Herbicide treatments, sequential, effects on weeds and soybeans 695
Herbicides, combinations with other pesticides, response of peanuts to 24
Herbicides, differential selectivity on six *Setaria* taxa 428
Herbicides, diffusion to seed 128

2,4,5-T and picloram, absorption and penetration into detached live oak leaves 138
2,4,5-T and picloram, morphological response of two mesquite varieties to 712
2,4,5-T, environmental effects on absorption and translocation in winged elm 431
Table beets and snap beans, competition of common purslane in 4
Tall morningglory, competition with sicklepod and cotton 576
Tartary buckwheat, translocation and metabolism of dicamba in 107
2,3,6-TBA, dicamba, and picloram, dissipation of 323
Temperature and organic arsenicals, response of cotton to 294
Temperature, effect on phytotoxicity and root uptake of several herbicides 571
Temperature, moisture, and light, interactions on terbutryn toxicity 732
Temperatures and dark periods, different, control of johnsongrass selections under 419
Terbacil, analysis by electron capture gas chromatography 307
Terbacil, translocation in purple nutsedge 306
Terbutryn toxicity, interactions of light, temperature, and moisture on 732
Time of herbicide application, influence on control of kudzu .. 669
Tissues, plant, response to nitrofen 662
Tobacco, witchweed, and other plants, pyriclor selectivity on 90
Tolerance, of Yuchi arrowleaf clover to herbicides 254
Tomato, cabbage, and lettuce seedlings, influence of four weeds on enzyme components of 735
Tomatoes, effect of magnesium and photoperiod on atrazine toxicity to 524
Toxicity, absorption, and translocation, of 2,4,5-T 510
Translocation and absorption of 2,4,5-T in winged elm, environmental effects on 431
Translocation and metabolism of atrazine, in sudangrass, sorghum, and corn 98
Translocation and metabolism of dicamba, in tartary buckwheat 107
Translocation and penetration, picloram in Canada thistle 349
Translocation and shoot zone uptake, of soil-applied herbicides 156
Translocation and root absorption, of picloram by oats and soybeans 727
Translocation and uptake, selected herbicides in mugwort 325
Translocation, degradation, and uptake, diphenamid in plants 639
Translocation, metabolism, selectivity, and uptake, of dicamba 113
Translocation of dicamba, effect of 2-chloroethylphosphonic acid in wild garlic 73
Translocation terbacil in purple nutsedge 306
Translocation through host plants, witchweed control by herbicides after 240
Translocation, toxicity, and absorption, of 2,4,5-T 510
Triallate, disappearance from field soils 536
Trifluralin absorption, microradioautographic study of 363
Trifluralin and nitralin, differential phytotoxicity of 31
Trifluralin and nitralin, shoot zone activity of 37
Trifluralin and organophosphorus compounds, effect on cotton seedlings 166
Trifluralin, dissipation from soil 285
Trifluralin, effects on growth, nodulation, and anatomy of soybeans 147
Trifluralin, IAA, and kinetin, effects on cotton seedlings 265

WEED SCIENCE is a journal published by the Weed Science Society of America. The subscription price is $20.00 yearly for six issues; single copies $4.00.

Address all communications regarding subscriptions and reprints to F. W. Slife, Department of Agronomy, University of Illinois, Urbana, Illinois 61801. All checks, money orders, and other remittances should be made payable to the Weed Science Society of America.

The editorial office is located at 2183 McCarthy Hall, University of Florida, Gainesville, Florida 32601. Inquiries concerning manuscripts and other materials for publication should be addressed to the editorial office.

Printing is by the W. F. Humphrey Press, Inc., Geneva, New York.

To join the Weed Science Society of America, send remittance of $15.00, payable to the Weed Science Society of America, to Dr. F. W. Slife, Department of Agronomy, University of Illinois, Urbana, Illinois 61801. Give name, official position (if any), and complete address. Dues are for the calendar year only.

Entered as second-class matter at the post office at Urbana, Illinois, with additional entry at Geneva, New York
